

Operation House ID

NightVISION Reflective Address Signs are now being installed at the request of individual residents!

An Independent Contractor of Address America will begin working on this street starting tomorrow. We are trying to install individual address signs straight down the street, so that in case of an emergency, especially at night, your home can be found more easily. Ambulances, fire departments, patrol cars, cabs, repair and delivery persons depend on reflective signs at night.

Can 911 find your home when every second counts?

Most homes are difficult to find at night, and that's when **NightVISION Numbers really stand out**. This very attractive sign is highly visible both day and night. **NightVISION Numbers are BRILLIANTLY REFLECTIVE**. Your address will show up at night like an Interstate sign!

Your participation is appreciated.

To be included ... simply write your address on the line below and tape this notice inside a window of your house, facing out, **by 9:00 a.m. tomorrow** so it can be seen from the street. A representative will collect payment only **after** your NightVISION sign has been installed and you are completely satisfied.

This sign is constructed of weather resistant materials including powder-coated steel, aluminum and high-impact polypropylene. NightVISION reflective numbers are 4" high.

Meets or exceeds all city and county codes requiring residential address numbers

If your sign is not installed in three days, please call:

Print your address on the line above

THIS SIGN COULD SAVE YOUR LIFE!
